

iPlay Cornhole

Visual outline: the full picture for image generation

Read this first (for the image AI). This document describes a mobile game called **iPlay Cornhole** and everything about how it must look. It is the shared context for every image you are asked to make. Keep every image consistent with it: the brand, the scene, the board, the bags and the people. When a request in the chat conflicts with this document, ask before guessing.

The logo. The image above is the real iPlay app icon: a dark brushed-metal tile with a glowing cyan "i" and a play triangle. This is **the** iPlay mark. Whenever an image includes the logo, use this exact mark. Never redesign, restyle or re-letter it.

11. What is already decided

1. The game in one page

iPlay Cornhole is a first-person, regulation cornhole game for phones, played **landscape**. You stand at the board and see your hand holding a bag at the bottom of the screen. The far board is 27 feet ahead, across a summer park cookout. You aim with a line and a landing ring, pull back for distance and flick up to throw. Wind changes every inning.

- **Modes:** 1 vs 1 and 2 vs 2. Friends by invite link, video opponents (bots), and **ranked** matches with global leaderboards for singles and duo teams.
- **Players:** adults only (18+). Live voice chat between players.
- **Money:** free with ads. Nothing to buy and no betting, ever.
- **Rules:** official cornhole. 4 bags each, bag on the board = 1 point, in the hole = 3, cancellation scoring, play to 21.
- **Big moment:** when a bag drops in the hole, the custom iPlay LED board bursts with light and a game-show style "ring-in" bell plays. A "CORNHOLE!" result appears.
- **Family:** part of a set of iPlay games on one brand. The sister game is **iPlay Street Dice** (a bodega street-dice game). Both share one look and the same iPlay nameplate.

Example: Keisha (a video opponent) steps up at the far end and throws. Her bag flies toward you, slides up the board and drops in the hole. The board flashes white and her team color, the bell rings, and the nearby crowd reacts ("ayy!").

2. The iPlay look (brand rules)

One look across every iPlay game, set by Street Dice: **distressed dark surfaces, restrained cyan glow, gold edges, and clean functional lettering**. Premium and real, never cartoonish. The menus are dark; the game world itself (the park) is bright, natural daylight.

 Navy black #05080B	 iPlay cyan #0DCCF2	 Soft cyan #5FE0FA	 Gold edge #E8B84A
 Gunmetal #2A2F33	 Hot (rare) #FF4A1C		

- **Metal:** dark gunmetal, brushed with fine straight lines, exactly like the app icon. Used for the board frame and the nameplate.
- **Glow:** iPlay cyan, soft and controlled, like light coming from inside. Never neon overload.
- **Gold:** thin edges, rims and pinstripes only. An accent, not a fill.
- **Hot red/orange:** saved for one big moment only (a 5+ win streak). Do not use it elsewhere.
- **Lettering:** Barlow Condensed SemiBold for UI. Brush or graffiti style is allowed for big headings only.

3. The world: the park cookout scene

Scene 1: a big open park on a hot summer afternoon, at a hood BBQ cookout.

- Wide open green park in full afternoon sun. The cornhole lane is on flat, trimmed grass with open space around it.
- Cookout life in the **background only**: grills smoking, pop-up tents, folding tables, coolers, a speaker, string lights or balloons on the tents.

- A big, **female-heavy crowd** in the distance: mostly Black women, then Latina, then white. Curvy, thick-figured adults in summer outfits (sundresses, shorts, tank tops, sandals), hanging out, dancing, some watching the game. Some men mixed in.
- The crowd stays **behind and to the sides** of the boards, never between them. The lane stays clear.
- Background people are slightly soft-focus so the boards and players stand out.
- **No logos, brand names or readable text anywhere in the scene.**

Keep it natural

- Nobody poses or stares into the camera. Most people are in their own conversations; only those nearest the lane look over.
- At most one or two phones in any shot, and some shots have none.
- Describe the vibe and one or two details. Long checklists make everything happen at once and look staged.

Later scenes, after this one is locked: backyard, rooftop, beach.

4. Cameras, and what is video vs. 3D

The people and the place are real-looking video (made with Kling from approved still images). The bags, the board lights and the score are 3D in Unity. The same split as Street Dice, where video makes the bodega and Unity owns the dice.

Plate	What you see	When
1. Thrower View	First person from the pitcher's box, looking down the lane at the far board about 27 ft away. Your own board fills the lower part of the frame. Your hand comes in from the bottom-right (bottom-left for lefties).	Aiming and throwing; watching far-end players throw at you
2. Far Board Cam	Close-up of the far board, low and slightly to the side.	Cut to it about 0.3 s after a throw toward the far board
3. Neighbor Cut	Short side angle of the player sharing your end.	When the player beside you throws

- **Plates are locked stills.** One approved frame per angle; every video clip for that angle starts from it.
- **Boards in the video plates have their LED strips switched off** (dark, clear strips). Unity draws the light on top, so it can flash exactly when a bag drops in.
- Bags in 3D fly, land, slide, squash and stack, with a contact shadow, and really disappear into the hole.
- The game is **16:9 landscape**. Every plate, clip and menu is made 16:9.

5. The characters (video opponents)

8 characters, 4 women and 4 men, ages 30 to 50, dressed for a hot summer cookout. **All clothes are plain, with no logos or readable text.** Make one approved reference portrait per character first, then use that same reference for every clip so the face, body and outfit never change.

Name	Age	Look	Outfit	Personality
Keisha	34	Black woman, curvy, long braids pulled up	Bright yellow sundress, white sneakers, big hoop earrings	Smooth, confident, smiling trash talk
Tanya	46	Black woman, full-figured, short natural curls	Linen shorts set, sandals, sunglasses on her head	Auntie energy, cheers loud
Marisol	38	Latina, curvy, long wavy hair	Denim shorts, fitted tank top, wedge sandals	Quick, competitive, hypes her partner
Jenna	42	White woman, athletic-curved, blonde ponytail	Tank top, bike shorts, running shoes, visor	Serious form, quiet fist pump
Dre	36	Black man, tall, lean, low fade, beard	Plain white tee, basketball shorts, slides with socks	Cool and relaxed, airmail specialist
Big Mike	48	Black man, big build, bald, salt-and-pepper beard	Short-sleeve button-up, cargo shorts, grill apron in some clips	Grill master, big laugh, points at people
Carlos	41	Latino, stocky, short curly hair, mustache	Plain polo, khaki shorts, sneakers	Steady, slow nod when he scores
Travis	33	White man, average build, backwards cap, scruff	Plain tank top, board shorts, flip-flops	Goofy, dances after a cornhole

Each character needs 7 clips: idle, step-up, throw, good reaction, bad reaction, reaction to the opponent scoring, and a side-angle throw. Keisha is built first.

6. The board: the custom iPlay LED board

A premium, regulation cornhole board, iPlay-branded, that looks completely real: a **deep glossy black deck** with a clear-coat shine, a **brushed dark gunmetal frame** (like the app icon), **thin LED strips** down both long sides, along the front edge and in a ring around the hole, and the iPlay mark and nameplate on the deck.

Part	Real-world spec
Deck	24 x 48 in, deep glossy black, clear coat. The iPLAY CORNHOLE title logo (section 8) printed large on the lower half of the deck.
Hole	6 in across, centred 9 in from the back (top) edge. Metal trim ring with a thin gold inner edge.
Frame	About 3.5 in thick (2x4), brushed dark gunmetal, thin gold pinstripe accents.
Height	Back about 12 in off the ground, front about 3 in (the deck slopes toward the thrower).
LEDs	73 LEDs down each long side, 37 along the front edge, 24 in a ring around the hole. Frosted diffuser strips.
Front apron	The iPlay nameplate (section 8) mounted across the front.
Wear	Slight dust and bag-rub marks up the middle of the deck, so it looks played on.

What the lights do

Moment	Lights
Idle	Cyan running lights chase down both sides; slow glow on the front; small spinner around the hole.

Moment	Lights
Bag drops in the hole	Burst for 1.8 s: rails and front alternate white and the scoring team's bag color (max 3 flashes a second), hole ring pulses gold.
Inning scored	One soft pulse in the scoring team's color.
Match won	Fast chase in the winner's color and white, 4 s.

For still images: show the LEDs glowing softly cyan (the idle look) unless asked otherwise. For video plates: LEDs off.

7. The bags

- **Size and weight:** 6 x 6 in, about 16 oz, resin-filled, so they slump and sag over the board when they land.
- **Two sides:** smooth heavy **duck-cloth canvas** (slides) on one side, **suede** (grips) on the other.
- **Border:** double-stitched seam all round.
- **Logo:** the regular iPlay mark (the i and the play button from the app icon, without the square tile) screen-printed in the centre, about 3.4 in wide. **No words or lettering on the bags. White mark on dark bags, black mark on light bags.**
- **Weight:** real tournament bags that lie fairly flat and drape. Never puffy pillows. The suede side is the same color as the front.
- **Team B** bags also get a **stitched X** across the front, so color-blind players can tell the teams apart.

The 12 team colors

 Black #1B1B1B	 White #F4F4F2	 Red #C8102E	 Orange #FF6A13
 Yellow #FFD100	 Kelly Green #009A44	 Royal Blue #1D4ED8	 Sky Blue #6CC5F0
 Purple #6B2C91	 Hot Pink #E0218A	 Teal #00A5A8	 Maroon #6D1A2A

White mark on: black, red, kelly green, royal blue, purple, hot pink, teal, maroon. Black mark on: white, yellow, orange, sky blue.

8. The title logo and the iPlay nameplate

The play button carved into the P

The signature idea of the brand: the play button from the app icon is carved into the bowl of the letter P. The P stays a P; the glowing cyan play triangle sits inside it, as if cut into the metal. It appears in both the title logo and the nameplate.

Title logo: iPLAY CORNHOLE

Approved direction. "iPLAY" over "CORNHOLE" in chunky hand-brushed graffiti lettering of brushed silver metal with thick polished gold edges and a soft cyan glow. The play button carved into the P. The O of CORNHOLE is a glowing cyan cornhole hole. Cyan and gold paint splash behind.

For the final version: clean, readable letters with the exact spelling (lowercase i, then PLAY; CORNHOLE). **No bags, pillows or other objects** in the logo. Used on the board deck, the app icon/splash, menus and the store.

The iPlay nameplate (every iPlay game)

One brand plate shared by all iPlay games. In Cornhole it sits on the board's front apron; in Street Dice and future games it appears on menus, loading screens and wherever the brand shows. The round-1 image above is the approved look, **with one change: the word reads "iPlay" and the play button is carved into the bowl of the P** (in the image the triangle replaced the P).

- A slim horizontal plate, about **4 to 1**, dark brushed gunmetal like the app icon, bevelled edges, a thin polished gold rim, a small brass screw at each end.
- The word **iPlay** (lowercase i, capital P, lowercase lay) in the centre: the i and the carved play button glow cyan; "lay" is brushed silver.
- **Waveform: option 2, the sound meter.** Thin vertical bars mirrored top and bottom on both sides of the word, glowing cyan near the word and fading to warm gold toward the ends. It will be rebuilt as an exact shape in code so it is identical in every game and can bounce with sound.

9. Rules for every image

Two kinds of images

Kind	What it is	How to make it
Look reference	A realistic, photo-style picture of the finished thing, to agree the design.	Photorealistic, natural daylight, real materials, real detail.
Texture sheet	A flat close-up of a surface (fabric, metal, paint) that the 3D game wraps onto a shape.	Straight down, evenly lit, no shadows, fills the square, tiles seamlessly. Rule below.

Add to the end of every texture sheet prompt

Flat orthographic view straight down, perfectly even soft lighting, no shadows, no highlights, no reflections, no perspective, no vignette, no text, no logos, no border. The texture fills the whole square edge to edge and tiles seamlessly.

- **Logo images:** the real iPlay icon is attached. Use that exact mark. Never invent or restyle a logo.
- **Lettering:** the only words that may appear are **iPLAY CORNHOLE** (title logo) and **iPlay** (nameplate), spelled exactly. No other text, and no words on the bags.
- **Textures:** square, the largest size available, PNG. Fabrics in neutral mid-gray (the game tints them into team colors).
- **Realism:** real materials, real scale, real wear. No cartoon, no illustration style, no plastic look.
- **Consistency:** the board, bags and plate must match sections 6 to 8 in every image.

10. The image list, one image at a time

How to deliver the images

ONE image per reply. Never a collage, grid, contact sheet or several items in one picture. Every image is its own separate file at full resolution. Make only the image asked for, then stop. "next" means make the next one on the list; "redo" means make the same one again with the notes given. Images marked TEXTURE follow the texture rule in section 9.

1. Title logo, on black

Recreate image B, cleaner and final. "iPLAY" on top and "CORNHOLE" below in chunky hand-brushed graffiti lettering made of brushed silver metal with thick polished gold edges and a soft cyan glow behind. **The play button from the app icon is carved into the bowl of the P**, glowing cyan, as if cut into the metal. The O in CORNHOLE is a glowing cyan cornhole hole you can see down into. Cyan and gold paint splashes burst behind the letters. Exact spelling, every letter clean and readable: lowercase i, then P, L, A, Y; then C, O, R, N, H, O, L, E. No cornhole bags, no pillows, no other objects, no floor. Centred on pure black with space around it. Wide 3:2.

2. Title logo, transparent

Exactly the same logo as image 1, same splash, on a transparent background. PNG.

3. Nameplate, front-on

Recreate image C with one change: the word reads **iPlay** (lowercase i, capital P, lowercase l-a-y) and **the play button is carved into the bowl of the P**, so the P stays a P. The i and the play button glow cyan; "lay" is brushed silver. A slim horizontal plate about 4 to 1 wide, dark brushed gunmetal like the app icon, bevelled edges, a thin polished gold rim, a small brass screw at each end. On both sides of the word, a sound-meter waveform of thin vertical bars, mirrored top and bottom, glowing cyan near the word and fading to warm gold toward the ends. Perfectly front-on, flat, even lighting, no perspective, on pure black. Wide.

4. TEXTURE: nameplate metal

Close-up of dark gunmetal brushed metal with fine horizontal brush lines and a very slight satin sheen, matching the app icon. No lettering, no waveform.

5. Bags, hero photo

Photorealistic product photo of four premium regulation cornhole bags, 6 by 6 inches, on a glossy black cornhole board deck at a sunny summer park. Two royal blue bags with the **iPlay mark from the app icon (the i and the play button only, without the square tile)** screen-printed in white in the centre; two bright yellow bags with the same mark printed in black, and the yellow ones also have a stitched X across the front. **No words or lettering on the bags.** Heavy duck-cloth canvas, double-stitched edges, filled with resin pellets so they are heavy and lie fairly flat, draping slightly over each other: real tournament bags, not puffy pillows. One bag flipped to show its suede underside in the same color as its front. Natural daylight, shallow depth of field.

6. Bag laid flat, both faces

One royal blue bag laid perfectly flat, shown twice side by side: the duck-cloth front with the white iPlay mark (no words), and the suede back. Straight down, even lighting, no shadows, white background.

7. Board, hero photo

Photorealistic product photo of a premium regulation cornhole board, 24 by 48 inches, at a sunny summer park cookout, three-quarter view from the front at waist height. Deep glossy black deck with a clear-coat shine reflecting the sky, one 6-inch hole near the top. Frame of brushed dark gunmetal with thin gold pinstripe edges. Thin cyan LED strips glow softly along both long sides, the front edge, and in a ring around the hole. **The title logo from image 1** printed large on the lower half of the deck. **The nameplate from image 3** mounted across the front apron. Slight dust and bag-rub wear up the middle of the deck. The cookout crowd soft-focus in the background, behind and to the sides, never in front of the board. Natural daylight.

8. Board from straight above

The same board, viewed perfectly straight down, flat orthographic, the whole board filling the frame top to bottom, even lighting, no perspective, no shadows. Shows the exact layout: hole near the top, title logo on the lower half, LED strips down both sides, along the front and around the hole, metal frame around the edge.

9. TEXTURE: deck surface

Close-up of deep glossy black painted wood with a thick clear coat: very fine orange-peel texture in the lacquer, faint wood grain barely visible under the paint, a few microscopic dust specks.

10. TEXTURE: frame metal

Close-up of dark gunmetal brushed aluminium, fine straight horizontal brush lines, subtle variation, matching the app icon's metal.

11. TEXTURE: LED strip

Close-up of a frosted white LED strip diffuser with the lights switched off, milky and translucent, faint dots of the LEDs underneath, thin aluminium channel edges along the top and bottom. Wide strip filling the square, tiles left to right.

12. TEXTURE: deck wear

Grayscale map: pure black background with soft white streaks and smudges where bags slide up a board toward the hole, light scuffs and faint dust. Mostly black; the wear is subtle.

13. TEXTURE: hole trim

Close-up of a polished dark metal ring trim with a thin gold inner edge, straight down, the ring centred and filling the square, pure black in the middle. (This one does not need to tile.)

14. TEXTURE: board underside

Close-up of the underside of a cornhole board: sanded birch plywood with dark gunmetal folding-leg hardware and a black hinge bracket in one corner. (This one does not need to tile.)

15. TEXTURE: duck cloth

Close-up of heavy cotton duck canvas, tight even weave clearly visible, mid neutral gray (no color cast), slightly worn and soft.

16. TEXTURE: suede

Close-up of microsuede, short soft nap with gentle directional shading where it has been brushed, mid neutral gray (no color cast).

17. TEXTURE: bag stitching

Close-up of a double row of heavy stitching along the folded seam of a canvas bag, neutral gray fabric with slightly lighter thread, running straight left to right across the middle, tiles left to right.

18. TEXTURE: print grain

Grayscale map of screen-printed ink on canvas: white ink with tiny cracks, fabric weave showing through, small worn patches, on black.

11. What is already decided

Topic	Decision
Screen	Landscape (16:9), like Street Dice.
Scene	Big open park, summer hood BBQ cookout (section 3).
Board cam	On by default; far board only.
Bag colors	12-color palette, first come first served, no two teams share a color.
Hole sound	An original two-bell game-show ring-in (already made).
Light safety	LED bursts capped at 3 flashes a second; a soft-glow version for players who turn on "reduce motion".
Title logo	iPLAY CORNHOLE graffiti metal lettering with the play button carved into the P (section 8). On the deck, splash, menus and store.
Nameplate	iPlay with the play button carved into the P; sound-meter waveform (option 2).
Bags	The regular iPlay mark only (no words); realistic flat tournament bags.
Money	No wagers ever, nothing for sale; ads only, never during a match.
Video tool	Kling for the plates and character clips (a side-by-side test with other tools first).

Already built (not part of image work): the game server, rules, ranked play, leaderboards, voice chat, the Unity game logic, sounds, and the LED light patterns. The images in section 10 are the next step: they turn the plain prototype into the real-looking game.
