

iPlay Cornhole

Visual outline: the full picture for image generation

Read this first (for the image AI). This document describes a mobile game called **iPlay Cornhole** and everything about how it must look. It is the shared context for every image you are asked to make. Keep every image consistent with it: the brand, the scene, the board, the bags and the people. When a request in the chat conflicts with this document, ask before guessing.

The logo. The image above is the real iPlay app icon: a dark brushed-metal tile with a glowing cyan "i" and a play triangle. This is **the** iPlay mark. Whenever an image includes the logo, use this exact mark. Never redesign, restyle or re-letter it.

Contents

7. The bags
8. The iPlay nameplate (all iPlay games)
9. Rules for every image
10. Image list and prompts: board, bags, nameplate
11. What is already decided

1. The game in one page

iPlay Cornhole is a first-person, regulation cornhole game for phones, played **landscape**. You stand at the board and see your hand holding a bag at the bottom of the screen. The far board is 27 feet ahead, across a summer park cookout. You aim with a line and a landing ring, pull back for distance and flick up to throw. Wind changes every inning.

- **Modes:** 1 vs 1 and 2 vs 2. Friends by invite link, video opponents (bots), and **ranked** matches with global leaderboards for singles and duo teams.
- **Players:** adults only (18+). Live voice chat between players.
- **Money:** free with ads. Nothing to buy and no betting, ever.
- **Rules:** official cornhole. 4 bags each, bag on the board = 1 point, in the hole = 3, cancellation scoring, play to 21.
- **Big moment:** when a bag drops in the hole, the custom iPlay LED board bursts with light and a game-show style "ring-in" bell plays. A "CORNHOLE!" result appears.
- **Family:** part of a set of iPlay games on one brand. The sister game is **iPlay Street Dice** (a bodega street-dice game). Both share one look and the same iPlay nameplate.

Example: Keisha (a video opponent) steps up at the far end and throws. Her bag flies toward you, slides up the board and drops in the hole. The board flashes white and her team color, the bell rings, and the nearby crowd reacts ("ayy!").

2. The iPlay look (brand rules)

One look across every iPlay game, set by Street Dice: **distressed dark surfaces, restrained cyan glow, gold edges, and clean functional lettering**. Premium and real, never cartoonish. The menus are dark; the game world itself (the park) is bright, natural daylight.

 Navy black #05080B	 iPlay cyan #0DCCF2	 Soft cyan #5FE0FA	 Gold edge #E8B84A
 Gunmetal #2A2F33	 Hot (rare) #FF4A1C		

- **Metal:** dark gunmetal, brushed with fine straight lines, exactly like the app icon. Used for the board frame and the nameplate.
- **Glow:** iPlay cyan, soft and controlled, like light coming from inside. Never neon overload.
- **Gold:** thin edges, rims and pinstripes only. An accent, not a fill.
- **Hot red/orange:** saved for one big moment only (a 5+ win streak). Do not use it elsewhere.
- **Lettering:** Barlow Condensed SemiBold for UI. Brush or graffiti style is allowed for big headings only.

3. The world: the park cookout scene

Scene 1: a big open park on a hot summer afternoon, at a hood BBQ cookout.

- Wide open green park in full afternoon sun. The cornhole lane is on flat, trimmed grass with open space around it.
- Cookout life in the **background only**: grills smoking, pop-up tents, folding tables, coolers, a speaker, string lights or balloons on the tents.

- A big, **female-heavy crowd** in the distance: mostly Black women, then Latina, then white. Curvy, thick-figured adults in summer outfits (sundresses, shorts, tank tops, sandals), hanging out, dancing, some watching the game. Some men mixed in.
- The crowd stays **behind and to the sides** of the boards, never between them. The lane stays clear.
- Background people are slightly soft-focus so the boards and players stand out.
- **No logos, brand names or readable text anywhere in the scene.**

Keep it natural

- Nobody poses or stares into the camera. Most people are in their own conversations; only those nearest the lane look over.
- At most one or two phones in any shot, and some shots have none.
- Describe the vibe and one or two details. Long checklists make everything happen at once and look staged.

Later scenes, after this one is locked: backyard, rooftop, beach.

4. Cameras, and what is video vs. 3D

The people and the place are real-looking video (made with Kling from approved still images). **The bags, the board lights and the score are 3D in Unity.** The same split as Street Dice, where video makes the bodega and Unity owns the dice.

Plate	What you see	When
1. Thrower View	First person from the pitcher's box, looking down the lane at the far board about 27 ft away. Your own board fills the lower part of the frame. Your hand comes in from the bottom-right (bottom-left for lefties).	Aiming and throwing; watching far-end players throw at you
2. Far Board Cam	Close-up of the far board, low and slightly to the side.	Cut to it about 0.3 s after a throw toward the far board
3. Neighbor Cut	Short side angle of the player sharing your end.	When the player beside you throws

- **Plates are locked stills.** One approved frame per angle; every video clip for that angle starts from it.
- **Boards in the video plates have their LED strips switched off** (dark, clear strips). Unity draws the light on top, so it can flash exactly when a bag drops in.
- Bags in 3D fly, land, slide, squash and stack, with a contact shadow, and really disappear into the hole.
- The game is **16:9 landscape**. Every plate, clip and menu is made 16:9.

5. The characters (video opponents)

8 characters, 4 women and 4 men, ages 30 to 50, dressed for a hot summer cookout. **All clothes are plain, with no logos or readable text.** Make one approved reference portrait per character first, then use that same reference for every clip so the face, body and outfit never change.

Name	Age	Look	Outfit	Personality
Keisha	34	Black woman, curvy, long braids pulled up	Bright yellow sundress, white sneakers, big hoop earrings	Smooth, confident, smiling trash talk
Tanya	46	Black woman, full-figured, short natural curls	Linen shorts set, sandals, sunglasses on her head	Auntie energy, cheers loud
Marisol	38	Latina, curvy, long wavy hair	Denim shorts, fitted tank top, wedge sandals	Quick, competitive, hypes her partner
Jenna	42	White woman, athletic-curved, blonde ponytail	Tank top, bike shorts, running shoes, visor	Serious form, quiet fist pump
Dre	36	Black man, tall, lean, low fade, beard	Plain white tee, basketball shorts, slides with socks	Cool and relaxed, airmail specialist
Big Mike	48	Black man, big build, bald, salt-and-pepper beard	Short-sleeve button-up, cargo shorts, grill apron in some clips	Grill master, big laugh, points at people
Carlos	41	Latino, stocky, short curly hair, mustache	Plain polo, khaki shorts, sneakers	Steady, slow nod when he scores
Travis	33	White man, average build, backwards cap, scruff	Plain tank top, board shorts, flip-flops	Goofy, dances after a cornhole

Each character needs 7 clips: idle, step-up, throw, good reaction, bad reaction, reaction to the opponent scoring, and a side-angle throw. Keisha is built first.

6. The board: the custom iPlay LED board

A premium, regulation cornhole board, iPlay-branded, that looks completely real: a **deep glossy black deck** with a clear-coat shine, a **brushed dark gunmetal frame** (like the app icon), **thin LED strips** down both long sides, along the front edge and in a ring around the hole, and the iPlay mark and nameplate on the deck.

Part	Real-world spec
Deck	24 x 48 in, deep glossy black, clear coat. iPlay mark printed large in cyan on the lower half of the deck.
Hole	6 in across, centred 9 in from the back (top) edge. Metal trim ring with a thin gold inner edge.
Frame	About 3.5 in thick (2x4), brushed dark gunmetal, thin gold pinstripe accents.
Height	Back about 12 in off the ground, front about 3 in (the deck slopes toward the thrower).
LEDs	73 LEDs down each long side, 37 along the front edge, 24 in a ring around the hole. Frosted diffuser strips.
Front apron	The iPlay nameplate (section 8) mounted across the front.
Wear	Slight dust and bag-rub marks up the middle of the deck, so it looks played on.

What the lights do

Moment	Lights
Idle	Cyan running lights chase down both sides; slow glow on the front; small spinner around the hole.

Moment	Lights
Bag drops in the hole	Burst for 1.8 s: rails and front alternate white and the scoring team's bag color (max 3 flashes a second), hole ring pulses gold.
Inning scored	One soft pulse in the scoring team's color.
Match won	Fast chase in the winner's color and white, 4 s.

For still images: show the LEDs glowing softly cyan (the idle look) unless asked otherwise. For video plates: LEDs off.

7. The bags

- **Size and weight:** 6 x 6 in, about 16 oz, resin-filled, so they slump and sag over the board when they land.
- **Two sides:** smooth heavy **duck-cloth canvas** (slides) on one side, **suede** (grips) on the other.
- **Border:** double-stitched seam all round.
- **Logo:** the iPlay mark screen-printed in the centre, about 3.4 in wide. **White mark on dark bags, black mark on light bags.**
- **Team B** bags also get a **stitched X** across the front, so color-blind players can tell the teams apart.

The 12 team colors

 Black #1B1B1B	 White #F4F4F2	 Red #C8102E	 Orange #FF6A13
 Yellow #FFD100	 Kelly Green #009A44	 Royal Blue #1D4ED8	 Sky Blue #6CC5F0
 Purple #6B2C91	 Hot Pink #E0218A	 Teal #00A5A8	 Maroon #6D1A2A

White mark on: black, red, kelly green, royal blue, purple, hot pink, teal, maroon. Black mark on: white, yellow, orange, sky blue.

8. The iPlay nameplate (every iPlay game)

One brand plate shared by all iPlay games, so the brand reads the same everywhere. In Cornhole it sits on the board's front apron and under the logo on the deck. In Street Dice and future games it appears on menus, loading screens and wherever the brand shows.

- A slim horizontal plate, about **4 to 1** wide, in the same dark brushed gunmetal as the app icon. Bevelled edges and a thin polished gold rim.
- On the left, the iPlay mark glowing cyan. Next to it, the word **iPlay** in clean, bold, modern lettering (spelled exactly: lower-case i, capital P).
- A **custom audio waveform** runs the full width behind the lettering. It looks etched into the metal and lit from inside: cyan in the middle, blending to warm gold toward both ends.
- The waveform will be rebuilt as an exact vector shape so it is identical in every game and can pulse with sound. Images of it are a **design target**; three style options are requested in section 10.

9. Rules for every image

Two kinds of images

Kind	What it is	How to make it
Look reference	A realistic, photo-style picture of the finished thing, to agree the design.	Photorealistic, natural daylight, real materials, real detail.
Texture sheet	A flat close-up of a surface (fabric, metal, paint) that the 3D game wraps onto a shape.	Straight down, evenly lit, no shadows, fills the square, tiles seamlessly. Rule below.

Add to the end of every texture sheet prompt

Flat orthographic view straight down, perfectly even soft lighting, no shadows, no highlights, no reflections, no perspective, no vignette, no text, no logos, no border. The texture fills the whole square edge to edge and tiles seamlessly.

- **Logo images:** the real iPlay icon is attached. Use that exact mark. Never invent or restyle a logo.
- **Lettering:** the only words that may appear are "iPlay" (exact spelling) and, where asked, "CORNHOLE". No other text.
- **Textures:** square, the largest size available, PNG. Fabrics in neutral mid-gray (the game tints them into team colors).
- **Realism:** real materials, real scale, real wear. No cartoon, no illustration style, no plastic look.
- **Consistency:** the board, bags and plate must match sections 6 to 8 in every image.

10. Image list and prompts: board, bags, nameplate

Order: first the three hero looks (A1, B1, C1) and the waveform options (C4) to agree the design; then the texture sheets. File names are what to call each image.

A. The board

#	Image	Kind	File name
A1	The finished board, hero view	Look reference	board-ref-hero.png
A2	The board from straight above	Look reference	board-ref-top.png
A3	Glossy black deck surface	Texture	board-deck-albedo.png
A4	Brushed dark gunmetal frame	Texture	board-frame-metal.png
A5	Frosted LED diffuser strip, lights off	Texture	board-led-diffuser.png
A6	Scuff and bag-rub wear (black and white)	Texture	board-deck-wear.png
A7	Metal and gold trim ring around the hole	Texture	board-hole-trim.png
A8	Deck artwork (logo and nameplate) alone	Transparent decal	board-deck-decal.png
A9	Underside, legs and hinge hardware	Texture	board-underside.png

A1. Board hero (attach the logo)

Photorealistic product photo of a premium regulation cornhole board, 24 by 48 inches, at a sunny summer park cookout, three-quarter view from the front at waist height. Deep glossy black deck with a clear-coat shine reflecting the sky, one 6-inch hole near the top. Frame of brushed dark gunmetal like the attached app icon, with thin cyan LED strips glowing softly along both long sides, the front edge, and in a ring around the hole. The attached iPlay logo printed large on the lower half of the deck in glowing cyan, with a slim brushed-metal "iPlay" nameplate across the front apron. Gold pinstripe edge accents. Real wood and metal detail, slight dust and bag-rub wear on the deck, natural daylight, shallow depth of field. Use this exact logo, do not redesign it.

A2. Board from above (attach the logo)

Same board as before, viewed perfectly straight down from above, flat orthographic, the whole board filling the frame vertically, even lighting, no perspective, no shadows. Shows the exact layout: hole near the top, logo on the lower half, LED strips down both sides and in a ring around the hole, metal frame around the edge. Use this exact logo.

A3. Deck surface

Close-up of a deep glossy black painted wood surface with a thick clear coat: very fine orange-peel texture in the lacquer, faint wood grain barely visible under the paint, a few microscopic dust specks. [texture rule]

A4. Brushed metal

Close-up of dark gunmetal brushed aluminium, fine straight horizontal brush lines, subtle variation, matching the attached iPlay app icon's metal. [texture rule]

A5. LED diffuser

Close-up of a frosted white polycarbonate LED strip diffuser with the lights switched off, milky and translucent, faint dot pattern of the LEDs underneath, thin aluminium channel edges along the top and bottom. Wide strip filling the square, tiles left to right. [texture rule]

A6. Wear map

Grayscale texture map: pure black background with soft white streaks and smudges where cornhole bags slide up a board toward the hole, light scuffs and faint dust. Mostly black; the wear is subtle. [texture rule]

A7. Hole trim

Close-up of a polished dark metal ring trim with a thin gold inner edge, the kind set around a hole in a premium board. Straight down, the ring centred and filling the square, pure black in the middle. Even lighting, no shadows, no perspective.

A8. Deck artwork (attach the logo and the approved nameplate)

The deck artwork alone for a cornhole board, on a transparent background: the attached iPlay logo large and centred, glowing cyan with a soft halo, and the iPlay nameplate below it. Flat graphic, no board, no perspective, no shadows. Use this exact logo.

A9. Underside

Close-up of the raw underside of a cornhole board: sanded birch plywood with dark gunmetal folding-leg hardware and a black hinge bracket in one corner. Straight down, even lighting, no shadows, no perspective.

B. The bags

#	Image	Kind	File name
B1	The bags, hero view	Look reference	bag-ref-hero.png
B2	Duck-cloth fabric (slide side), neutral gray	Texture	bag-duck-albedo.png
B3	Suede (grip side), neutral gray	Texture	bag-suede-albedo.png
B4	Stitched border seam	Texture strip	bag-stitch-strip.png
B5	Screen-print ink grain (black and white)	Texture	bag-print-grain.png
B6	One bag laid flat, both faces	Look reference	bag-ref-flat.png

B1. Bags hero (attach the logo)

Photorealistic product photo of four premium regulation cornhole bags, 6 by 6 inches, resting slumped on a glossy black cornhole board deck at a summer park. Two cobalt blue bags with the attached iPlay logo screen-printed in white in the centre, two bright yellow bags with the same logo printed in black, and the yellow ones also have a stitched X across the front. Heavy duck-cloth canvas, double-stitched edges, resin-filled so they sag naturally over the board. One bag flipped to show its suede underside. Natural daylight, shallow depth of field. Use this exact logo, do not redesign it.

B2. Duck cloth

Close-up of heavy cotton duck canvas fabric, tight even weave clearly visible, mid neutral gray (no color cast), slightly worn and soft. [texture rule]

B3. Suede

Close-up of microsuede fabric, short soft nap with gentle directional shading where it has been brushed, mid neutral gray (no color cast). [texture rule]

B4. Stitch strip

Close-up of a double row of heavy stitching along the folded seam of a canvas bag, neutral gray fabric with slightly lighter thread, running straight left to right across the middle of the square, tiles left to right. [texture rule]

B5. Print grain

Grayscale texture map of screen-printed ink on canvas: white ink with tiny cracks, slight fabric weave showing through, small worn patches, on black. [texture rule]

B6. Flat bag (attach the logo)

Photorealistic photo of one cobalt blue cornhole bag laid perfectly flat, shown twice side by side: the duck-cloth front with the attached iPlay logo screen-printed in white, and the suede back. Straight down, even lighting, no shadows, white background. Use this exact logo.

C. The iPlay nameplate

#	Image	Kind	File name
C1	The nameplate, hero view	Look reference	nameplate-ref-hero.png
C2	The nameplate flat, front-on (master layout)	Look reference	nameplate-ref-flat.png
C3	The plate metal with no lettering or waveform	Texture	nameplate-metal.png
C4	Three waveform style options	Look reference	nameplate-waveform-options.png

C1. Nameplate hero (attach the logo)

Photorealistic close-up of a premium slim horizontal brand nameplate, about 4 to 1 wide, mounted on the front of a glossy black cornhole board. Dark gunmetal brushed metal like the attached app icon, bevelled edges, a thin polished gold rim. On the left, the attached iPlay logo glowing cyan; next to it the word "iPlay" in clean bold modern lettering. A smooth audio sound waveform runs the full width of the plate behind the lettering, etched into the metal and glowing iPlay cyan from inside, blending into warm gold toward both ends. Subtle reflections, real machined detail, outdoor daylight. Use this exact logo, do not redesign it.

C2. Nameplate flat

The same nameplate, perfectly front-on, flat orthographic, filling the frame left to right, even lighting, no perspective, no shadows, on a pure black background. Exact spelling "iPlay".

C3. Plate metal

Close-up of dark gunmetal brushed metal with fine horizontal brush lines and a very slight satin sheen, matching the attached app icon. [texture rule]

C4. Waveform options

Three different glowing audio waveform designs stacked on a black background, each a single horizontal line the full width: 1) a smooth flowing wave that swells in the middle, 2) a spiky sound-meter waveform of thin vertical bars, mirrored top and bottom, 3) a soft layered waveform of three overlapping translucent lines. Each glows cyan in the middle, fading to gold at both ends. Flat, no perspective, no text.

11. What is already decided

Topic	Decision
Screen	Landscape (16:9), like Street Dice.
Scene	Big open park, summer hood BBQ cookout (section 3).
Board cam	On by default; far board only.
Bag colors	12-color palette, first come first served, no two teams share a color.
Hole sound	An original two-bell game-show ring-in (already made).
Light safety	LED bursts capped at 3 flashes a second; a soft-glow version for players who turn on "reduce motion".
Logo	The iPlay app-icon mark on the board deck, the bags and the nameplate.
Money	No wagers ever, nothing for sale; ads only, never during a match.
Video tool	Kling for the plates and character clips (a side-by-side test with other tools first).

Already built (not part of image work): the game server, rules, ranked play, leaderboards, voice chat, the Unity game logic, sounds, and the LED light patterns. The images in section 10 are the next step: they turn the plain prototype into the real-looking game.
